Career Objective

Motivated Computer Science Engineering student specializing in Health Informatics with strong interest in software development, Java programming, web technologies, and problem solving. Seeking opportunities to apply technical skills and build real-world projects.

Education

Bachelor of Technology in Computer Science and Engineering (Health Informatics) 2023 – 2027
VIT Bhopal *Kerala, India*

Skills

Programming Languages: Java, Python, C
Web Technologies: HTML, CSS, JavaScript
Database: MySQL
Tools: Git, GitHub, VS Code, Google Colab
Concepts: Data Structures and Algorithms, OOPs

Projects

Diabetes Prediction using Machine Learning 2025
Python, Google Colab

- Implemented Logistic Regression, Decision Tree, KNN, and Naive Bayes models using Pima Indians Diabetes Dataset.
- Compared model performance and analyzed prediction accuracy.

Student Management System 2025
Java, MySQL

- Developed a basic student record management system using Java.
- Implemented CRUD operations and database connectivity.

Certifications

- Java Programming Course
- Introduction to Machine Learning
- Data Structures and Algorithms Basics

Achievements

- Active learner in software development and problem solving.
- Built beginner-level machine learning projects using Python.
